Hiring Manager
Devfum

Dear Hiring Manager,

I am excited to apply for the Junior Data Scientist position at Devfum. I found this opportunity through [source of job listing] and am eager to bring my knowledge in data science and AI/ML to help solve real-world challenges at your company.

I have a Bachelor's degree in [Your Degree] from [Your University] and a strong foundation in Python, along with experience using machine learning tools like TensorFlow and PyTorch. In my academic projects, I've worked on AI models, including generative AI and large language models (LLMs). I'm also familiar with Flask, which I understand is important for this role.

The chance to work on generative AI projects at Devfum really interests me. I am drawn to the collaborative environment you offer, where I can contribute to meaningful projects and learn from skilled mentors. I'm confident that my skills and motivation would help me make a positive impact on your team.

My main goal is to earn an interview to discuss how my background aligns with Devfum's goals. Please let me know if you need any more information. Thank you for considering my application, and I look forward to the chance to talk more about how I could contribute.

Yours sincerely,
Hania Salman
